

YD-XCJ01 Magnetic Storage Media Degausser

High-strength information-erasure equipment for hard drives, magnetic tapes, cards, and floppy disks

Product Overview

The YUEDU YD-XCJ01 is a Super-size degausser designed to rapidly and thoroughly erase information stored on large magnetic media. It accepts server hard drives without requiring removal of their mounting brackets, as well as large-format magnetic tapes, magnetic cards, floppy disks, desktop hard drives, and laptop hard drives.

The unit has passed product evaluations conducted by relevant national confidentiality and military information-security authorities. Through its USB connection and management software, the complete degaussing workflow can be administered from a computer. Manually generated logs can be imported for centralized management, while computer-managed records can be exported for backup. The result for each processed drive may also be printed on a self-adhesive label and attached to the media for traceability.

>10,000 G Minimum field strength	25 seconds Degaussing cycle	278 × 160.3 × 35.8 mm Chamber opening	USB Computer management

Technical Specifications

Specification	Value / Description
Model	YD-XCJ01
Supported media	Desktop hard drives; server hard drives with mounting brackets; laptop hard drives; floppy disks; large-format magnetic tapes; magnetic cards
Chamber opening	278 × 160.3 × 35.8 mm
Magnetic field strength	Field strength at the lowest point within the effective degaussing area exceeds 10,000 G (gauss)
Degaussing time	25 seconds per cycle
Degaussing log management	Detailed logs are generated for each degaussing cycle and may be searched and reviewed. Logs stored on the unit can be imported into the management software for centralized administration and printing.
Computer-based management	Authorized users can manage the complete degaussing workflow and record the operator, supervising officer, media type, destruction time, responsible department, degaussing voltage, magnetic field strength, and degaussing result.
Magnetic-field monitoring	Included
Voltage monitoring	Included
Voltage-boost compensation	Included
Magnetic shielding	Dual-layer magnetic shielding surrounds the degaussing coil, including the chamber opening, to reduce magnetic-field leakage. Magnetic-field leakage protection and shielding are provided. An independent magnetic-field test report is available.
Input-voltage fluctuation protection	If mains voltage varies by season or time of day, the voltage-boost compensation system activates to maintain a complete degaussing cycle.
Power supply	220 V ±20%; 50/60 Hz
Rated power	200 W
Net weight	28 kg
Overall dimensions	550 × 450 × 200 mm

About YUEDE Shredders

Shanghai YUEDU Technology Co., Ltd. is a **Shanghai-certified high-tech enterprise** specializing in the development and manufacturing of **shredding and destruction equipment**. We serve a wide range of sectors including **government agencies, financial institutions, military departments, enterprises, and recycling industries**.

Our offerings include **office and industrial-grade paper shredders, hard drive destroyers, plastic crushing systems, and fully customized destruction center solutions**. From design to delivery, we help clients achieve efficient, secure, and compliant material destruction.

Our Mission

We are dedicated to the shredding and destruction industry, continuously solving diverse material shredding and disposal challenges for our clients around the world.
